

Avant STAMP offers the broadest range of languages available, providing unparalleled opportunities for students to showcase their language skills in over 50 languages. Our unique, computer-adaptive technology allows students to earn multiple TEKS levels in a single test session, making earned LOTE credits easier to award for Credit by Exam purposes.

Avant STAMP is the only test that seamlessly aligns with LOTE TEKS Levels I-V, covering proficiency from Novice Low to Advanced Mid—in one adaptive assessment.

Test Credits Ordering & Testing Process

1. Plan and Order Test Credits

- District determines the number of test credits needed for an academic year.
- Since nearly all of the languages we offer cost the same, there is no need to know which languages you will need when ordering. Credits can be converted for the few languages that have a different price per test.
- Validity Note: Credits are valid through the end of the following academic year.

2. Request a Quote

- Avant provides a quote.
- Invoice generated after the quote is signed or PO is received.

3. Set Up Test Access

- Set-Up Form sent to district contact.
- Form needs completion 7-10 days before testing.
- Denote testing groups, languages, and testing dates.
- Option for group rostering (pre-roster students).

4. Start Testing

- Avant creates and sends test access.
- Must be proctored (in-person or remote for 13+).

5. Receive and Review Test Results

- Full results available in 10-12 business days (up to 21 days for ASL).
- Results accessible via Avant's results dashboard.
- Option to print individual score reports.

6. Convert Scores to Credits

- Districts award LOTE credit based on results.
- Use Avant's score conversion sheet to determine the number of TEKS credits earned.

*Conversion sheet provided after an order is made

SCAN ME

We work with hundreds of districts across Texas to provide solutions for all language assessment needs. Our adaptive assessments, reliable results, and professional learning opportunities help you support your students, teachers, and administrators.

LOTE Credit by Exam

Avant STAMP tests are used to meet the requirements for CBE and place students at the proper level of their LOTE program. The STAMP test can be taken in person at the school or remotely through our proctoring system (remote proctoring is only available for test takers aged 13 and older). Since the test is adaptive, students can score from Novice Low to Advanced Mid on the ACTFL scale. This aligns with TEKS I-V and provides the opportunity to accurately place students in LOTE programs. Students do not need to take a different test for each TEKS level, saving your district time and money!

The Avant STAMP test is available in over 50 languages, providing more access to students with proficiency in a language not offered in the district. We also offer a monolingual Spanish test. This is great for those new arrivals or emergent bilinguals with limited English who need to earn their LOTE credits to graduate.

Bilingual and Dual Language Immersion (DLI) Programs

Avant STAMPe (for ages 12 and below) is ideal for Dual Language Immersion and Bilingual programs. It provides data for schools and districts to track learner progress and keep stakeholders informed. The Avant MORE Learning Team offers teacher support through customized virtual and in-person professional learning solutions.

Teacher Incentive Allotment (TIA)

Our reliable test results provide LOTE teachers the opportunity to demonstrate learning outcomes for higher TIA earning potential. Avant partners with you to provide pre-tests and post-tests for TIA. We deliver professional learning sessions to guide you in using assessment data to improve instruction and meet growth targets.

Convenience and Security Features

Avant has obtained TX-RAMP certification which shows our commitment to continued partnership with Texas educational agencies.

Our tests can be delivered through both Clever and ClassLink to ensure districts have clean, reliable, and secure data.

Avant STAMP assessment data can be automatically imported into ELlevation so that you can see your data side by side with results from other tests for students – whether they are in a Dual Language Immersion, Bilingual Education, or World Language programs.

Avant is registered with several purchasing CO-OPs in Texas, making the ordering process more streamlined and getting students testing quicker!
